WE ARE JACOB

Jacob Companies offers unparalleled qualifications and experience in construction management, owner's representation and general contracting services throughout North America. **JACOB** works independently as a Contractor/CM, and collaboratively as a stakeholder partner with architects and engineers, providing design-build, preconstruction, cost estimation, and constructability support services. Jacob also provides planning and pre-project development consultation to clients on conceptual projects where scope and budget needs to be established.

JACOB works with a variety of project delivery methods from traditional plans & specs bidding, to CM/CMAR and design/build with a qualified architecture partner.

- Maintain Documentation of Job Progress
- Approve Applications for Payments
- Coordinate Owner Occupancy Schedule
- Coordinate Punch List Process
- Coordinate As Built
- Coordinate Start up and Instruction
- Coordinate O&M Manuals and Warranties

OFFICES NATIONWIDE

PRE-CONSTRUCTION

Typically we provide preconstruction services on the basis of actual staff time committed to the project multiplied by hourly rates plus reimbursables.

This cost can be reduced by "fast tracking" the design process and establishing early bid packages such as excavation, foundations, steel and mechanical equipment, thus allowing construction to begin months sooner.

DESIGN REVIEW/COST

- Validation of the existing project budget, from trade costs to soft costs.
- Cost trending analysis to monitor the progress of the design against the proposed budget.
- Value engineering options, considering design review, detailed analysis, lifecycle cost analysis, cost-benefit analysis/ selection
- Review the advantages of pre-purchasing select items.

CONSTRUCTION

We work with a variety of project delivery methods from CM/CMAR, traditional plans and specs bidding, full service design/build with a qualified architecture or engineering firm.

CM/CMAR services is fee based and typically a percentage of the construction cost for a project.

Parking Garages / Structures / Decks

JACOB is a nationally certified, WBENC, woman owned, multifaceted construction firm. Jacob has exemplary qualifications and experience in construction management, owner's representation and general contracting services throughout North America. Jacob works collaboratively with a diverse constituency of architecture and engineering partnering companies providing design-assist, preconstruction, cost estimation, and constructability support services. Jacob also provides planning and pre-project development consultation to clients on new or additions/renovations projects. The key to Jacob's success is collaboration, transparency and responsiveness. We act in the client's best interest from the inception of the project and we work seamlessly with all consultants and stakeholders to achieve success.
